The Process of Reading

1. **There need be no process.** *Figure out what is right for you and apply it consistently.*
2. **Form a question even if it is:** What do I need to know?
3. **Based on the question, determine the Spread... OR not to spread.**
4. **Shuffle until you are finished shuffling.**
5. **Split however feels right or just start laying cards.**
6. **Take a minute and form your initial impressions without forcing logic.**
7. **Scan the cards for patterns of numbers, court cards, majors, elements, directional cards, etc.**
8. **Work through the spread if there are positions or what stands out if there are none.**
**NOTE: Keep question in mind!*
9. **Consider what cards mirror or speak to each other naturally.**
10. **Pull the message into a sentence or two and combine with your initial impressions.**

***Finding spreads to use is easy, there are many spread books available, google keywords such as [relationship tarot spread] [new moon in Libra tarot spread], etc. and then click Images. Be polite and give credit when using on social media!**
